Agricultural.

THE POULTRY TO KEEP.

there are so many different conditions in its which the fowin are to be kept, and so many different breeds of poultry, that almost each individual poultry, keeper will have requirements different from others, and in answering the question we can, therefore, speak in general terms only.

Each breed of poultry has marked

is an easy matter to re-ommend a special vidual.

which are included the different "Cuchina," "Shanghaes," "Brahmis," etc., are not

with all large breeds of polity, and we have invariably found the half breeds the most profitable. The chicks of the horoughbreds do not make so rapidly, and they are, from their nakedness of inverted they are, from their nakedness of inverted they are, from their nakedness of their lives, more subject to disease than the half breeds that the nost critical period of their lives, more subject to disease than the half breeds and all stant fifty feet from the located centre line of the railway of said company of said company by Luke Garvey, east by lives, more subject to disease than the half breeds are for lined, excepting therefor, that any existing law or any which shall enact that any existing law or any which shall ena

The latter feather out much earlier than the other, and this is largely in their favor in this climate of sudden and great chang es of temperature. The poultry breeder, then, who wishes quick growing and early maturing chickens, who cares more for than five pounds in September, a cross seven leet; thence along some south thirty seven one of the varieties of the Brahms en degrees forty-four minutes west two hundred oetween one of the varieties of the Brahma and the common fowl is most desirable. A very popular and profitable cross has grees sixteen minutes cast two hundred and been found between the Brahma and Leg. three feet seven inches to the line of chirles P. horn, the offspring matering quickly, and the pullets being early and good layers. To the large poultry keeper, who wishes eggs more than chickens, of course the non-incubating breeds, or their grades are eighty-two feet one inch to the place of beginmost valuable. Crosses of Leghorns, Spansh or Polish, with the common fowl, we have found to be, on the whole, about as profitable, or, rather, as good layers, as the throughbreds, and they stand our rough climate much better.

Of course, in the foregoing, we have not intended to include the breeders of fancy win, compissions, and Edgar T. Gould and fowls to be sold at "fancy prices," but we Hannah M. Gou d, his wife, defendants.—Fi. fa., istanded to treat simply of ordinary poultry keepers.

and early eggs, the Dark Brahma is, perhaps, the best, either full bred or grade, and if he is not particular as to the purity of the blood, but wishes the greatest pemen of an old bachelof the world ever cuniary retures, a cross between Brown heard of. He was old, gray, wrinkled and Leghorns and White Brahmas, or White odd. He and Annt Polly had it not when better than any other steels. The half Leghorn, and makes a good setter and

GRINDING WHEAT.

GREAT INCREASE IN THE QUANTITY OF PLOUR PROM A GIVEN QUANTITY OF WESAT - OPRING BETTER THAN WINTER WHEAT -A COMPLETE REVOLUTION IN PRODUCTION.

A Milwankee Correspondent of the N Y. Times, calls attention to a revolution now in progress in our midst, in connecnon with the most important industry of earth, because it relates to the 'staff of life," than which, nothing can be more important, being no less than a revolution in

This revolution involves and comprenend. Fir-t-The production of sixteen pounds of flour from the quantity of wheat formerly used in producing a barrel of flour. Second—A quality of flour vastly used superior in all respects to any before produced as a general thing. Third -It canbles the superior flour to be made from spring wheat, which has not hereto-tore produced the best flour; thus making that kind of wheat, heretofore the interior,

Under the present process of converting wheat into flour, which this new process is sider,"

I den't wan't any considering: I'm go supplanting, the wheat was conversed by I den't wan't any considering: I'm go supplanting, the wheat was conversed by I den't wan't any considering: I'm go supplanting the wheat was conversed by I den't wan't any considering I'm go supplanting the wheat was conversed by I den't wan't any considering I'm go supplanting the wheat was conversed by I den't wan't any considering: I'm go supplanting the wheat was conversed by I den't wan't any considering: I'm go supplanting the wheat was conversed by I den't wan't any considering: I'm go supplanting the wheat was conversed by I den't wan't any considering: I'm go supplanting the wheat was conversed by I den't wan't any considering the wheat was conversed by I den't wan't any considering the wheat was conversed by I den't wan't any considering the wheat was conversed by I den't wan't any considering the wheat was conversed by I den't wan't any considering the wheat was conversed by I den't wan't any considering the wheat was conversed by I den't wan't any considering the wheat was conversed by I den't wan't any considering the wheat was conversed by I den't wan't any considering the wheat was conversed by I den't wan't any considering the wheat was conversed by I den't wan't any considering the wheat was conversed by I den't want was conversed latter products were largely of the nature of the products the production were walled every there and inferior quality of flour made from them; but as a neral thing the middlings went with the brun to feed stock, or went to the distiller, Inastruch as all the flour obtained was in this first process the object was naturally to get as much flour as possible by it, to which end the grinding was done as fine wit was possible without entirely destroying the berry, and at a high rate of speed.

Under this new process the wheat is ground what is technically tarner "higher," which untechnically is simply "coarser," the stones running with a next to the Constitution of New Jersey, passed by the last Legislature and filed in your office by the Secretary of the Senate.

Sin: - You are hereby directed to cause to be published in all of the newspapers of this Stat, natherized to publish the laws of the last session of the Legislature, by one ins ration each of aid newspapers, the proposed Amendments to the Constitution of New Jersey, passed by the last Legislature and filed in your office by the Secretary of the Senate.

Sin: - You are hereby directed to cause to be published in all of the newspapers of this Stat, natherized to publish the laws of the last session of the Legislature, by one ins ration each of aid newspapers, the proposed Amendments to the Constitution of New Jersey, passed by the last Legislature and filed in your office by the Secretary of the Senate.

Sin: - You are hereby directed to cause to be published in all of the newspapers of this Stat, natherized to publish the laws of the last as alterized to publish the laws of the last anticiped to publish the laws of the last anticiped to publish the laws of the last anticiped to publish the "coarser," the stones running wide apart and slower to accomplish the result. Under

the old process it is important to get as much as possible, which this slow and Coarse grinding accomplishes.

Upquet bashly, the new process will en-

the tool to be found. After a long and tance or different sections of the country as fruitless search, he set off for his neighbor's wheat bearing regions. Under the old in great distress, to acknowledge his fault. But how great was his surprise to find the wheat furnished by all odds the best articular than the nit appeared from the print of his lit. dition from the nothern tier of the South-of money the horse for the month of the south-of money the horse for the month of the south-of money. tle bare feet in the mud, that the lad had ere States, on three in the mud, that the lad had ere States, on three in the mud, that the lad had got up in his sleep and carried the tool the Northern States. Virginia, Kentucky, home, and gone to bed again without and Missouri furnished the bulk of the sleep was prompt when awake. He lived barrel in the market than the flour of the bors and was placed in market his difference barrel and the difference barrel in the market than the flour of the bors and was placed in market in the market than the flour of the wheat making the best flour-which flour sionally much greater. Now spring wheat makes a better article than can possibly be made with the winter. In fact, the winter cannot be used to any advantage under this new process. The effect is, that the relative importance of the North west and the States referred to, has been suddenly myersed. Now the four made of Spring wheat by this process commands at least
